1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kaneda et al, Iwahara et al, Sakamoto et al, Sasaki et al, Hoshuyama, Marash, Choi et al, Elko, Marash et al, Maisano, Kajala et al, and Zhang et al are made of record here as pertinent art to the claimed invention.

Each of the cited reference above discloses directional microphone or microphone array apparatus having specific beamforming characteristics and with the microphone apparatus also including directivity control for enhancing received acoustic signal.

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior art fails to disclose or suggest an apparatus for suppressing an acoustic interference signal in an incoming audio signal, and method for performing such functions, comprising: a directional microphone system having at least two microphones for detecting said incoming audio signal, each of the at least two microphones generating a microphone signal therefrom; weighting units for respectively weighting the microphone signals with respective weightings for producing at least two directional microphone signals, the respective weightings defining a direction-dependent sensitivity of the directional microphone system; a normalization unit connected to the

weighting units for normalizing the respective directional microphone signals with respect to the same sensitivity of the directional microphone system in one direction region, for producing a plurality of normalized directional microphone signals each having an interference signal component; and a selection unit connected to said normalization unit for selecting one of the normalized directional microphone signals having a lowest interference signal component as an output directional microphone signal as recited and construed in independent claims 1 and 13. Applicant's invention of comprises a specific combination of elements and with their specific functional steps that is neither taught nor suggested by the cited prior art listed above.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xu Mei whose telephone number is 703-308-6610. The examiner can normally be reached on Monday-Friday (9:30-6:00), alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sinh Tran can be reached on 703-305-4040. The fax
